

Dunn Memorial Hospital

- Located in Bedford, IN
- Project Description: A design-build project in association with Geupel DeMars Inc., Phase I included a new penthouse and three story 68,500 s.f. addition clad in limestone. The first floor is occupied by out-patient functions including laboratory expansion, patient services, cardiology, cardiac rehabilitation, physical therapy, occupational therapy, vascular laboratory, cardiopulmonary, oncology, medical records, physicians lounge and educational services. A 2,500 s.f. renovation to the surgery suite for an endoscopy suite and surgical staff locker/lounge facilities also was completed. Floors two and three were constructed as shell space. Phase II consisted of an extension of services from the power plant and programming of the second floor shell space. The new area includes an 11 bed critical care unit, 12 station renal dialysis unit and new cafeteria.
