Crete Carrier Corporation and Shaffer Trucking Indianapolis, Indiana Terminal

ARCHITECTURE INTERIOR DESIGN
LANDSCAPE ARCHITECTURE ENGINEERING

This interior renovation of the Indianapolis terminal was designed with the drivers and operations in mind. It includes offices, a large conference room, driver training rooms, driver restrooms, showers, laundry, lunch and break areas, sleeping rooms and after hours lounge and showers. The interior amenities provide drivers all that is needed to handle their everyday needs in a comfortable atmosphere. Along with the interior renovation, the hard surface parking lot has been resurfaced creating ample parking spaces with more than enough room to move around the property and a new security gate system was installed.
