

**Bloomington South High School**  
Bloomington , IN

To meet the needs of a growing student body, Bloomington High School South completed additions including a new classroom layout, gymnasium/physical education expansion, commons area, general classrooms and science labs. Renovations affected the administration, media center and cafeteria. The building was reconfigured to accommodate the educational programs, and new mechanical and electrical systems were installed. A new main entry and three story commons area was constructed to unify the separate buildings. Large expanses of glass and white metal siding panels differentiate the addition from the limestone masses of the surrounding buildings. Site work included a new parking lot.
