

Helman Hall, Oakwood Hall
Manchester University
Manchester, IN

Helman Hall

OMS designed a three story facility to house 129 students. The hall includes a fireplace and vaulted ceiling in the community area. Rooms are arranged in suites with every two rooms sharing a restroom. The building also features guest rooms and a computer lab.

Oakwood Hall

Designed to accommodate 131 students, Oakwood Hall incorporates a suite layout. Each suite houses two to four students and includes a restroom. A great room with a fireplace is located in the community area. The space has a wood tongue and groove ceiling. The building design also incorporates high pitched gable roofs and limestone and brick detailing. These features mirror the character of traditional college structures.
