Morocco Elementary School

Morocco, IN

Originally built in 1921, Morocco Elementary received two additions. A large, two-story addition on the northeast corner of the existing building includes twelve classrooms, two kindergarten rooms, and a new media center. The second addition is located at the southwest corner of the building against the existing stage. The addition houses the cafeteria, kitchen and receiving area on the first floor with a music room and mechanical fan room on the second floor. The existing gymnasium and lower level rooms remain mostly unchanged; work was limited to mechanical, plumbing and electrical systems. Renovations include ADA accessibility, exterior repair, window and ceiling replacements, and selected new finishes.
