

**Noblesville High School**  
Noblesville, IN

Economy, multi-use and flexibility were carefully considered in the design phase. To maximize use of the long, narrow site, several large use areas are arranged along a major circulation path. The three main areas include the academic house, arts and wellness components. Community access to classrooms, the media center, cafeteria, gymnasium, arts facilities, the natatorium and industrial technology department can be compartmentalized for use after hours.
