

**Noblesville East Middle School**  
Noblesville, IN

Following the completion of the new Noblesville High School, the older high school facility was converted for use as a middle school. In eight phases, the building was renovated and reconfigured to accommodate the middle school curriculum. Areas affected included the media center, performing arts space, cafeteria/kitchen, instructional areas including science labs, physical education, large group instruction, administrative offices, and restrooms. The facility received new finishes throughout, and modifications to the HVAC system were completed to fit the reconfigured space.
