

Whiteland High School
Whiteland, IN

This new multipurpose facility is designed to serve the physical education and athletic team needs of middle and high school students and to provide recreation opportunities for the community of Whiteland.

The addition includes an auxiliary gymnasium featuring two regulation basketball courts, volleyball, badminton, batting cages and bleacher seating for 600 spectators. Also included in the facility is a natatorium, community locker rooms, a weight room and a training room. The coaches' offices and a concession area was also incorporated in the multipurpose facility. The organization of the floor plan allows ease of access for community and after school activities, while maintaining separation from academic portions of the high school. Circulation throughout the facility is sized to accommodate sudden surges of spectators and athletes. Trophy cases line the entire length of one side of a corridor, creating a spectacular "wall of fame".
